

Lost Meadows Mule Refuge Mule Identification Policy  
Revised 01-24-2020

Once a mule has entered into the Lost Meadow Mule Refuge's (LMMR) system, they will be an LMMR mule for life. Lost Meadows does not ever relinquish ownership, even when a mule is adopted. To ensure that our mules are easily identifiable, both individually and collectively, and don't end up in sale barns or on Craigslist, LMMR uses 2 forms of identification:

125 kHz (9 digit) subcutaneous microchip or 134.2 kHz (15 digit) subcutaneous microchip inserted on the left center side of the mule's neck approximately 3" below the mane.

and

A 4" "MR" freeze brand placed on the left front shoulder.

The freeze brand is our assurance that LMMR's mules can be easily identified for life. The freeze brand effects the color of the hair in the location in which it is applied. If you ever see a mule with the MR brand on any auction lot, please contact LMMR immediately at (866) 366-5731 or email [matti@lmmr.org](mailto:matti@lmmr.org).
